SUMMARY

Detail-oriented B-Tech graduate (2026) seeking an entry-level Frontend / Full-Stack Software Developer role. Possesses strong foundations in React.js, MySQL, PostgreSQL, MongoDB, and Core CS Fundamentals ,OOPs. Demonstrated ability to engineer production-ready web applications with RESTful APIs, JWT authentication, and event-driven workflows gained through practical full-stack projects and a 1-year software development internship.

EXPERIENCE

Software Developer – Intern

CUB TO KING IT SOLUTIONS PVT. LTD.

March 2025 – March 2026, Pune, Maharashtra

- Engineered responsive web interfaces using React.js and CSS Flexbox/Grid across 10+ pages, improving mobile rendering speed by 25% across all major browsers.
- Collaborated with senior engineers to translate client wireframes and functional specifications into interactive, high-performance UI components.
- Developed a scalable library of 20+ reusable React.js components, improving codebase maintainability and reducing developer implementation time by 30%.
- Conducted frontend debugging, cross-device testing, and Lighthouse audits, resolving 35+ UI issues and participating in agile sprint deliveries.

PROJECT

ShopKart — E-Commerce Platform

Personal Project • June 2026 – Present

- Architected a full-stack e-commerce store with product search, multi-criteria filtering, cart, wishlist, and order status tracking.
- Designed 15+ secure RESTful API endpoints with rate limiting and stock validation, automating inventory restoration upon order cancellations.
- Implemented multi-role authentication with passwordless email OTP for shoppers and bcrypt-hashed JWT RBAC for admin controls, with automated invoice emails.

Online Food Delivery

Personal Project • December 2025 – Present

- Designed a responsive ordering web app featuring dynamic menu rendering and category filtering using asynchronous Fetch API and client-side JSON parsing.
- Built an interactive shopping cart with real-time price calculations, quantity toggles, and animated carousel transitions across 15+ menu items using Swiper.js.

EDUCATION

B-TECH (Electronics and Computer Engineering)

Dr. Babasaheb Ambedkar Technological University (DBATU) • 2026 • 7.50

CERTIFICATIONS

Introduction to Front End Development

Simplilearn • 2026

Introduction to HTML and CSS

IBM SkillsBuild • 2026

Prompt Engineering for Developers

Wingspan • 2026

SKILLS

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript (Basics), Java, SQL, HTML5, CSS3
- Frontend Technologies: React.js, Context API, Tailwind CSS, Bootstrap, Responsive Web Design, DOM Manipulation
- Backend & APIs: RESTful APIs, Supabase, JWT
- Databases: PostgreSQL, MongoDB, MySQL
- Developer Tools & Platforms: Git, GitHub, VS Code, Eclipse, Vercel, Netlify
- Areas of Interest: Full-Stack Web Development, Frontend Engineering, Backend Development, Database Development
